

Theranostics

The Forum for Diagnostics, Imaging, and Therapy Research

Front Cover:

Intra-arterial peptide receptor radionuclide therapy (IA-PRRT) in patients with SSTR-expressing neuroendocrine neoplasms: short- and long-term safety and efficacy for up to 13 years

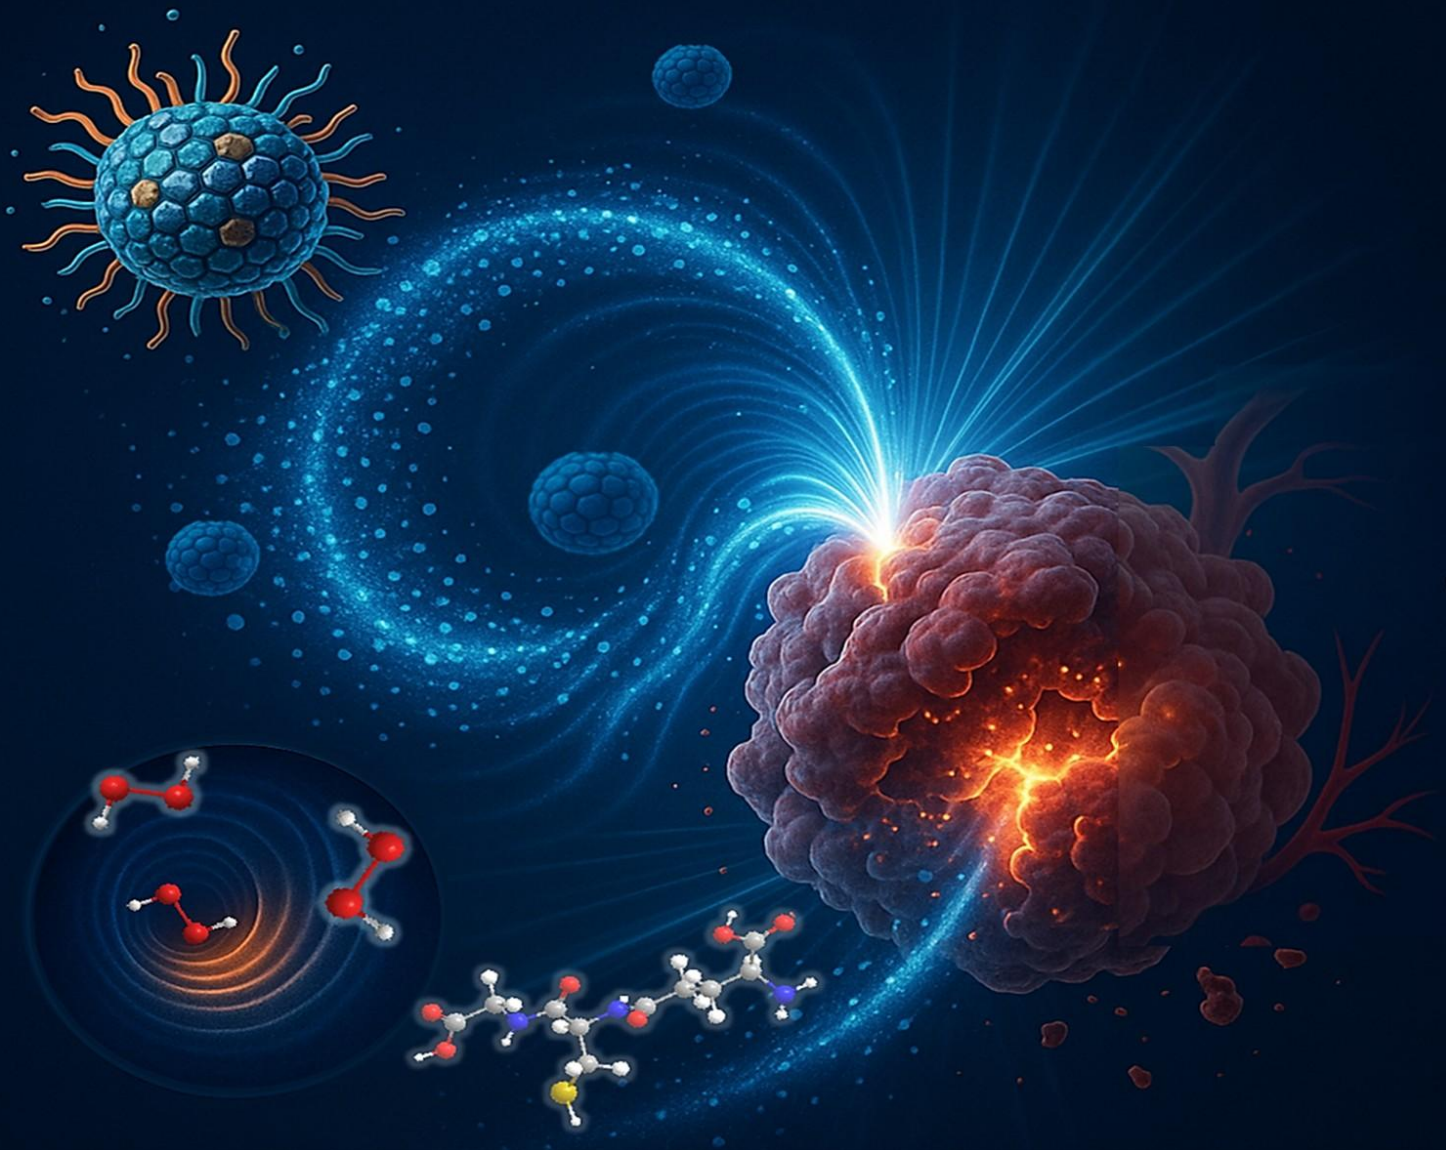

Jingjing Zhang et al. pp. 1658

IVYSPRING
INTERNATIONAL PUBLISHER

Theranostics

The Forum for Diagnostics, Imaging, and Therapy Research

Inside Front Cover:

Self-boosting targeted anticancer therapy via cancer cell self-reprogramming with GGT-targeting oxidative stress nanoamplifiers

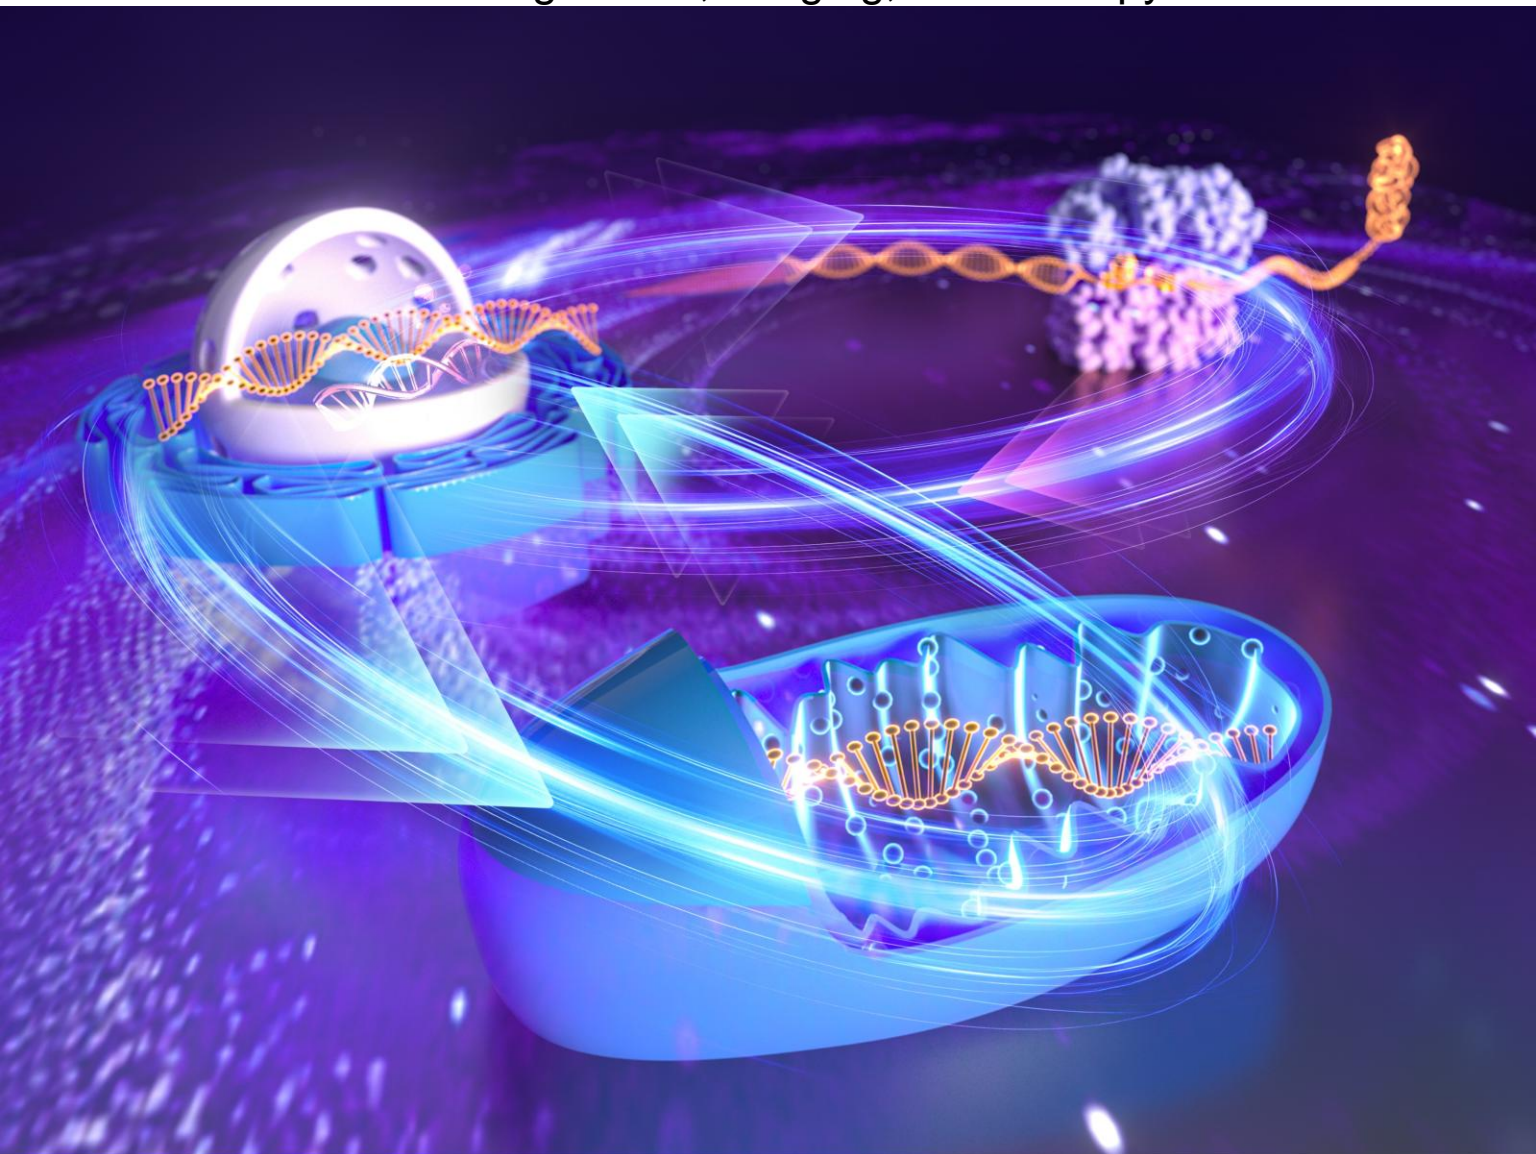

Sujin Kim et al. pp. 1925

IVYSPRING
INTERNATIONAL PUBLISHER

Theranostics

The Forum for Diagnostics, Imaging, and Therapy Research

Inside Back Cover:

Mitochondria-specific targeting of noncanonical EGR1 ntmRNA-coordinated mitophagy receptor BNIP3 homodimerization disrupts mitochondrial metabolism and suppresses hepatocellular carcinoma growth *in vitro* and *in vivo*

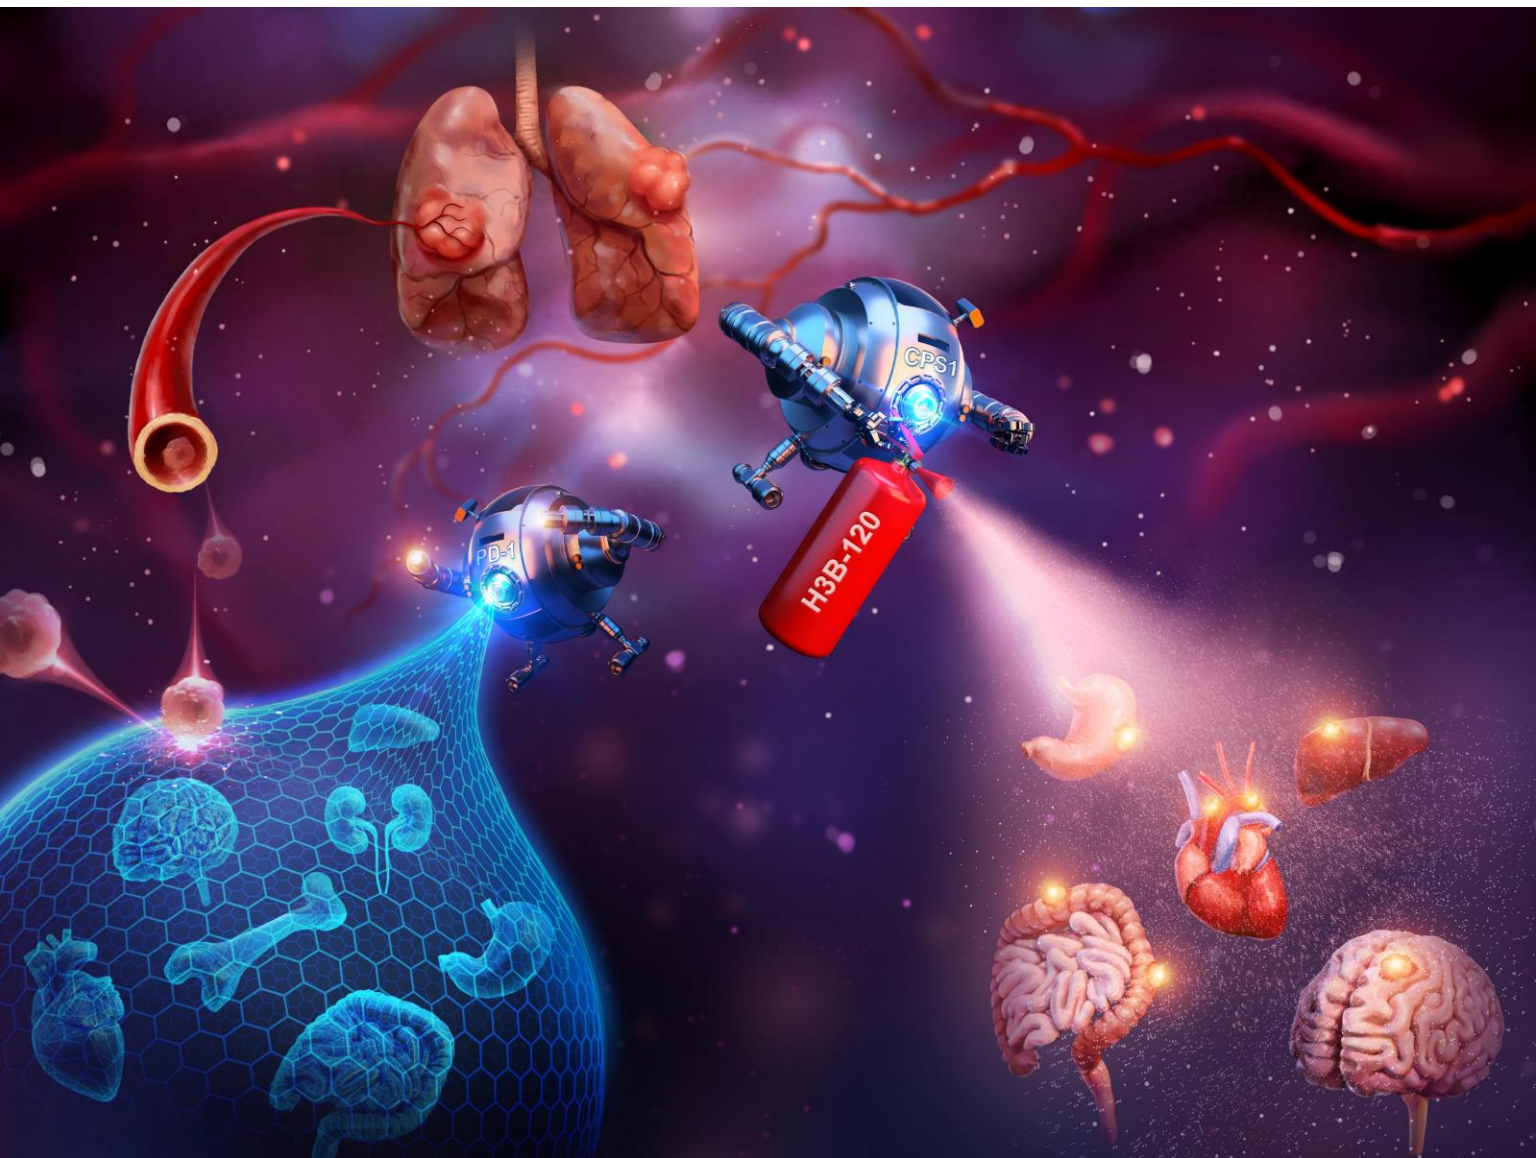

Yan Li et al. pp. 1681
