# Supplementary figure

Figure S1

Figure S1. Kaplan–Meier curves for overall survival in the TCGA-STAD and ACRG cohorts according to the expression of individual prognostic genes. (A-C) Kaplan–Meier curves for overall survival of 342 gastric cancer patients from the TCGA-STAD cohort according to the VCAN mRNA level (A), CLIP4 mRNA level (B), and MATN3 mRNA level (C). The provided *P* values are from log-rank tests. (D-F) Kaplan–Meier curves for overall survival of 300 gastric cancer patients from the ACRG cohort according to the mRNA level of VCAN (D), CLIP4 (E), or MATN3 (F). The provided *P* values are from log-rank tests.
